APPL-NO: 60112661 (JP 85112661)

FILED: May 25, 1985

ASSIGNEE: NIPPON SIGNAL CO LTD, THE

INT-CL: G06F15/21, (Section G, Class 06, Sub-class F, Group 15, Sub-group 21); G06F15/42, (Section G, Class 06, Sub-class F, Group 15, Sub-group 42)

ABST:

PURPOSE: To decrease as less as possible the waiting time of the patients by using a window processor, a clinical chart retriever, a consultation room processor and a patient calling device, etc. to process a consultation ticket made of a visible magnetic card.

CONSTITUTION: When a consultation ticket Cd made of a magnetic card of a non-first visit patient is put into a window processor A, the position of a medical chart is shown automatically by a clinical chart retriever B based on the data read out of the ticket Cd. Then the ticket Cd is accepted and this acceptance number is set automatically. This acceptance number is displayed visibly at a display part of the ticket Cd. Then a calling counter is advanced by a consultation room processor when the consultation is through. The acceptance number is displayed at the number display part of a patient calling device D. Thus the waiting patient can collate the number shown on his/her ticket Cd with the number displayed on the device D.
